DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/16/2005 has been entered.

Allowable Subject Matter

Claims 7, 8, and 11-20 are allowed.

Per newly added independent claims 15, 17, and 19, the Examiner finds the Applicant's arguments filed on 9/16/2005 (pages 6-9) to be persuasive that the invention as now claimed is not taught, nor reasonably suggested in combination by the prior art. Specifically, the prior art does not teach or reasonably suggest the claimed apparatus and method wherein the controller reduces torque first according to a rapid torque reduction and secondly according to a smoother, continuous torque reduction as now claimed. As discussed in the Applicant's arguments, the closest prior art (Abe et al. USUS005433676A) teaches reducing torque according to two different reduction strategies, one of which is rapid and the other smooth. However, the prior art does not teach the transition from the rapid to the smooth torque reduction in the manner that is now claimed by the newly added independent claims.

Art Unit: 3661

Claims 7, 8, 11-14, 16, 18, and 20 serve to further define the invention of claims 15, 17, and 19 over the prior art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric M. Gibson whose telephone number is (571) 272-6960. The examiner can normally be reached on M-F.
